

# temperature control mechanics

*TEMPERATURE CONTROL MECHANICS WORK TO MAINTAIN COMFORT LEVELS IN CAMPUS BUILDINGS.*

## SERVICES

- Responding to hot, cold, and humidity calls
- Maintaining and repairing heating, ventilation, and air conditioning (HVAC) systems and components
- Troubleshooting electrical and plumbing systems

Temperature Control mechanics maintain and repair air compressors in buildings and laboratories, as well as thermostats and thermostat covers. They also make adjustments to water temperatures in buildings when requested.

**Request all services through the my.FS Portal. For additional information or assistance, contact the Service Office at 217-333-0340.**
